

TIENDA DE COMERCIO ELECTRÓNICO

ITERACIÓN 07 – ORDEN DE COMPRA

Autor: Mag. Juan Antonio Castro Silva
Versión: 1.0 Enero 29 de 2020 (20200129T1325)

1. ORDEN DE COMPRAS

En esta iteración se va implementar la funcionalidad de registrar las ordenes de compra (purchases), para ello se deben crear unas nuevas tablas en la base de datos, componentes y servicios web

2. CREAR LAS TABLAS

Tabla purchases:

```
001 CREATE TABLE public.purchases
002 (
003     id bigserial NOT NULL,
004     user_id bigint NOT NULL,
005     created_at timestamp without time zone DEFAULT now(),
006     updated_at timestamp without time zone DEFAULT now(),
007     CONSTRAINT purchases_pkey PRIMARY KEY (id),
008     CONSTRAINT purchases_user_id_fkey FOREIGN KEY (user_id)
009         REFERENCES public.users (id) MATCH SIMPLE
010         ON UPDATE NO ACTION ON DELETE NO ACTION
011 )
012 WITH (
013     OIDS=FALSE
014 );
015 ALTER TABLE public.purchases
016     OWNER TO ecommerce;
```

Tabla purchase_items:

```
001 CREATE TABLE public.purchase_items
002 (
003     id bigserial NOT NULL,
004     purchase_id bigint NOT NULL,
005     product_id bigint NOT NULL,
006     price double precision NOT NULL,
007     quantity double precision NOT NULL,
008     created_at timestamp without time zone DEFAULT now(),
009     updated_at timestamp without time zone DEFAULT now(),
010     CONSTRAINT purchase_items_pkey PRIMARY KEY (id),
```

```

011     CONSTRAINT purchase_items_product_id_fkey FOREIGN KEY (product_id)
012     REFERENCES public.products (id) MATCH SIMPLE
013     ON UPDATE NO ACTION ON DELETE NO ACTION,
014     CONSTRAINT purchase_items_purchase_id_fkey FOREIGN KEY (purchase_id)
015     REFERENCES public.purchases (id) MATCH SIMPLE
016     ON UPDATE NO ACTION ON DELETE NO ACTION
017 )
018 WITH (
019     OIDS=FALSE
020 );
021 ALTER TABLE public.purchase_items
022     OWNER TO ecommerce;

```

3. ASIGNAR PERMISOS

Para asignar los permisos de acceso a las tablas, ejecute el comando GRANT.

```

001 GRANT SELECT, UPDATE, INSERT, DELETE ON TABLE public.purchases TO ecommerce_admin;
002 GRANT SELECT, UPDATE, INSERT, DELETE ON TABLE public.purchases TO ecommerce_client;
003 GRANT SELECT, UPDATE, INSERT, DELETE ON TABLE public.purchase_items TO
004     ecommerce_admin;
005 GRANT SELECT, UPDATE, INSERT, DELETE ON TABLE public.purchase_items TO
006     ecommerce_client;
007 GRANT USAGE, SELECT ON ALL SEQUENCES IN SCHEMA public TO ecommerce_admin;
008 GRANT USAGE, SELECT ON ALL SEQUENCES IN SCHEMA public TO ecommerce_client;

```

Archivo org.software.purchase/Purchase.java

```

001 package org.software.purchase;
002
003 import java.sql.Timestamp;
004
005 public class Purchase {
006     long id;
007     long user_id;
008     Timestamp created_at;
009     String created_at_text;
010     Timestamp updated_at;
